

This is Kasikorn Bank, one of Thailand's leading commercial banks. For more than 80 years, our dependable banking services have secured the trust of our stakeholders.

Committed to being a bank of sustainability, we partner in creating value and delivering sustainability for all.

The world never stops. And that's why we never stop thinking, innovating, and building our strengths.

Through the 3 plus 1 strategy, to deliver sustainable value and help everyone live a more secure life. We enhance the quality of loan offerings via various products and services, to improve financial efficiency for all, and foster the advancement of life and business.

With the aim to deliver returns to all stakeholders, we offer investment and insurance products, along with comprehensive wealth advisory services throughout our customers' lives.

We continually reaffirm leadership in digital payment services by introducing innovations through KPlus, the most widely used mobile banking in Thailand. And to meet life's demands, anytime, anywhere, we at Kasikorn Bank are stepping into the future as a leader in digital payment channels. We connect KPlus with various ecosystems and platforms, blending with our physical services to provide seamless and secure service experiences, making every customer journey and transaction more effortless than ever.

But that's not all. We continuously focus on developing new innovations and services to expand opportunities and possibilities. We expanded our presence by growing our regional business network, expanding collaboration with partners, and providing solutions that go beyond banking.

All of this is achievable because we have invested in modern technologies, utilized data and analytics to create new services, and have a performance-driven talent pool to support our organization.

However, genuinely becoming a sustainable bank is about more than business growth. We must also prioritize living together in our society and environment.

Because all life is interconnected, that's why we incorporate ESG principles into our operations to enhance our organization and ensure we make a sustainable impact for this world. By supporting all players in achieving NetZero, we aim to play a key role in supporting the transition to new practices for the environment. We provide financial knowledge and discipline based on responsible lending, including financial literacy and awareness of financial risks in society.

And of course, we operate under good governance, providing fair and responsible services to customers while focusing on efficient risk management. With a commitment to attain ESG leadership among banks in Southeast Asia, we have integrated these principles into every aspect of our work. It is at our very essence.

We have implemented and adhered to all of this in order to maintain a balance between the economy, society, and environment.

As Kasikorn Bank continues in its development, you can rest assured that our unwavering commitment is to sustainable growth for all.
